

The Next Generation in Metalworking Chemistry

AN ISO 9001:2008 COMPANY

**With QualiChem's
Boeing-Approved
Fluids, Your
Productivity Will
Take Flight.**

There's Good Reason For That.

The Boeing approvals were prompted by a comprehensive tool life study completed by Boeing Phantom Works in which the XTREME CUT 290 showed a 44% increase in tool life on titanium.

Boeing also received requests for approval from aerospace subcontractors around North America who have documented similar tool life increases in controlled trials.

Boeing has approved these Qualichem aerospace machining fluids:

XTREME CUT 290

XTREME CUT 250C

XTREME COOL 365C

XTREME COOL 335

**Top-Flight Technology.
Accelerated Profits.
Supersonic Productivity.**

In addition to increased tool life, our customers have also reported significant improvements in the following areas:

- ▶ **Reduction in coolant consumption due to improved sheeting action**
- ▶ **Improved cleanliness on parts and machinery**
- ▶ **Elimination of foam in high-pressure applications**
- ▶ **Improved oil rejection due to better separation of tramp oil**
- ▶ **Longer sump life due to improved biostability**
- ▶ **Better rust protection for parts and machinery**
- ▶ **High operator acceptance**

Peak Productivity. Precision Parts.

QualiChem's Boeing-Approved Fluids Are The Perfect Choice.
